Introduction

It is essential that the combination of Printers, Products and Ribbons or Inks are correct, to ensure the best print quality and mark permanence.
Each combination of Printer, Product, Ribbon and Ink have been evaluated for Print quality and tested for mark permanence. Any deviation from the information contained in this document will invalidate any assurances of print quality and mark permanence.

This document supersedes all previous documents detailing Identification printer, ribbon and product combinations. Please always check for the latest revision of this document by using the following link or by asking your local TE representative.
Find Documents & Drawings

A downloadable declaration and further information covering RoHS and REACH compliance can be found at the 'TE Product Compliance Support Centre': product-compliance

When selecting a TT ribbon width, it is essential that the ribbon width covers the entire area of the label, to avoid missed print and damage to the print head.
