FEATURES AND SPECIFICATIONS

SLT3 Single Line Tester

Features and Benefits

The SLT3 Tester provides instant identification of most common voice and data cabling problems including shorts, opens, reversals, and miswires.

The master and remote units separate for end-to-end testing of installed cabling. Shorts, opens, reversals, or miswires are easily detected within seconds–the continuously sequencing LED display immediately alerts you to problems in the cabling system. Both pieces simply snap and lock together when not in use, making it easy to carry and store. When the units are interlocked, the battery is disabled, thus prolonging battery life.

Designed to fit into a tool box or pocket, the SLT3 Tester has a convenient "ring" feature for attaching to a belt or frame. A durable nylon carry case may be purchased as an optional accessory. Frame adapters are available for testing from the punch down block to the wall plate in one simple operation.

Approvals UL 1863

Material Thermoplastic UL94V-0

Mechanical Characteristics

Power Requirements:	9V Alkaline Battery (included)
Max Distance:	10,000 ft.
Interface:	USOC, 568A and 568B
Mating:	4W, 6W, 8W and 8W-keyed plugs
Contact Material:	50 µinches gold over 100 µinches nickel
