Indicating blade fuses and in-line fuse holders

BUSSMANN SERIES

Find blown fuses fast with *easy*ID™

New in 2019 *easy*ID ATR illuminating fuses

Product description:

Bussmann™ series *easy*ID illuminating blade fuses and holders use Light Emitting Diode (LED) technology to indicate that a fuse has opened, making it easy to spot in fuse panels tucked under dark dashboards.

Illuminating blade fuses are the ideal choice for fast and easy fuse replacement. Popular fuse types (ATR, ATC, ATM, Maxi™, FMX) are available in common fuse ratings for consumer convenience.

ATR fuses are the latest space-saving fuses for newer vehicles, while ATC fuses are used in both new and older automobiles and light trucks.

ATM fuses are used for a wide variety of applications involving late-model OEM vehicles.

Maxi fuses are used for protecting circuits in wiring harnesses (usually found under the hood in a fuse panel near the battery) and are increasingly used in domestic cars and some imports.

Female Maxi (FMX) fuses are used for late-model vehicles and are available in the most popular amp ratings.

Features and benefits:

- Available in popular sizes and ratings to cover the most common replacement fuse needs.
- Illuminating fuse holders use regular ATM and ATC blade fuses.
- Universal color coding makes it easier to match with a traditional non-illuminating fuse.
- Value packs, assortment and service kits provide popular packaging options to maximize retail sales.
- Specialty (black) packaging helps fuses stand out in any retail setting as being the superior choice.
