New Age announces the release of its Expandable Electronic Housing

SAN LUIS OBISPO, CA: New Age Enclosures announces the release of its highly contoured "Expandable Electronic Housing". Identified as part number P-191508, it measures 1.9" in length, 1.5" in width, and three options for height, 0.820", 0.945" and 1.070"

The E. E. Housing is a compact version of New Age's popular P-301910 Electronic Housing. The new smaller size with expandable height options is sure to prove itself perfect to an even wider number of programs. The contoured shape is extremely comfortable for handheld applications. Internally it accommodates a 1.15" wide x1.65" long PCB. The enclosures are now in stock in white and black RoHS compliant ABS plastic. For customization they may be ordered in custom colors, with CNC modifications, and pad print decorating.

New Age Enclosures is a division of Alltec Integrated Manufacturing. Alltec Inc. is an ISO AS9100:2009 and 9001:2008 quality certified injection molder serving the Aerospace Industry. Corporate headquarters and manufacturing are located in San Luis Obispo, CA.
